by the Increasing Popularity of Other Types of MEWPs?
Lai Eng Soon (Johnson), Sales & Marketing Manager, Keng Guan Skylift Sdn Bhd |
| 17:00 | End of Conference |

Speakers

Shashank Bhatia – Engineering Director, JLG Industries

Shashank has over 15 years' experience in the heavy manufacturing industry. He is passionate about new technology and has also made it the focus of his work. With a Master's degree in Mechanical Engineering, he mainly focuses on next generation technologies and products that will drive the future.

Er. Tan Kee Chong – Deputy Director (Engineering Safety) of Occupational Safety & Health Division Specialist Department, Ministry of Manpower (MOM), Singapore

Er. Tan joined MOM in 2001 and has held various portfolios in the Occupational Safety and Health Division. Throughout his tenure, he oversaw the development of various industry guidelines in codes of practices, technical advisories and safety & health guidelines. He has contributed to various technical committees for the metal working industry, work in confined spaces and codes of practice on safe working at height. In his current portfolio as Deputy Director (Engineering Safety), he is instrumental to ensuring the effectiveness of the system and policies relating to safe use of high-risk equipment, including cranes, pressure vessels and MEWPs.

Andrew Delahunt – Director of Technical & Safety, International, Powered Access Federation (IPAF)

Andrew gained experience in the sector as a design engineer of heavy capital equipment for companies manufacturing trucks and buses in Australia. As a design engineer, he ensured the products met regulations, the needs of the customer and the feasibility of his design. He joined the powered access industry in a safety and regulatory role at Haulotte Group and now, with IPAF, he aims to assist the industry to ensure in each phase – planning, training, delivery, setting-up and operation – that all people remain safe.

Peter Ellis – General Manager, Power Towers LLC

Peter joined Power Towers in 2007 to develop the low-level powered access market sector in the UK. In the last five years, he has been developing the market for low-level powered access in the Middle East and is now the Vice President of the IPAF Middle East Council. He has been in the powered access industry for 32 years, having been involved in equipment sales and rental.

Kang Han Fei – Managing Director, Aerial Lift & Equipment Sdn Bhd

Kang has over 27 years' experience in the industrial equipment industry. He graduated from Heriot Watt University in the UK and holds a Master's degree in Business Administration. He also has 17 years' of experience in equipment parts.

Janne Haapalainen – General Manager, Scan-Rent Sdn Bhd

Janne has been part of the Mast-Climbing Work Platforms (MCWP) industry in Asia and Oceania for the past 20 years. He holds a Master of Business Administration degree from the International Business School of the Malaysian University of Technology (UTEM). He has been part of the management team in establishing and operating several MCWP companies in Malaysia, Singapore, Thailand, Australia and New Zealand. He has wide knowledge of Scancrawler's MCWP applications in challenging industries like oil & gas, power plants, shipyards and skyscrapers.

Angel Ibanez – Global Representative for MCWPs and Related Products, International Powered Access Federation (IPAF)

Angel is in charge of developing IPAF's membership services and training programmes for MCWPs and related products (materials hoists, transport platforms and passengers hoists). With more than 20 years' experience in different areas of the machinery, automotive and construction sectors, he has broad experience in the MCWP and hoist industry worldwide. He worked for a decade as Sales Manager for SALTEC, Spanish manufacturer of TORGAR lifting equipment, and latterly as an independent consultant in the sector, advising commercial clients and industry bodies in Europe and Asia, such as the Japanese Lift Climber Association, with a focus on developing and adapting industry standards.

Nick Selley – Group Business Development Director, AFI and President, International Powered Access Federation (IPAF)

Nick has over 20 years' experience in the powered access industry. He joined AFI in 2003 following seven years with Lavendon Group where he worked in the UK and Germany. During his 15 years with AFI, he has played a key role in the development of the company, being heavily involved in acquisitions and other areas of new business development. He is also the current President of the International Powered Access Federation (IPAF).

Speakers

Lai Eng Soon (Johnson) – Sales & Marketing Manager, Keng Guan Skylift Sdn Bhd

Johnson's experience includes planning and advising customers on the use of truck-mounted platforms for major projects in Malaysia, such as Putrajaya Parcel F, Calvary Convention Church, NU Sentral, MRT 2 and LRT. He is also an IPAF Certified Instructor for 1b, 3a and 3b machine categories.

Au Choon Wai – Senior ESH Manager, Sunway Construction Group Berhad

Choon Wai joined Sunway in 2013 and has been involved in numerous projects, focusing on environmental and safety management at sites. He is well informed of the use of various MEWPs at Sunway.

Tim Whiteman – CEO & Managing Director, International Powered Access Federation (IPAF)

Tim commenced his current position in January 2004. He has more than 25 years' experience in the lifting industry, mainly as a publisher and journalist. He founded The Vertikal Press in 1999, publisher of Cranes & Access, Kran & Bühne and vertikal.net. Prior to that, Tim co-founded KHL International, the company that launched leading magazines such as International Cranes and Access International. Over eight years, he was responsible both as editor and later financial director. He sits on the Access Industry Forum and is a member of the European Rental Association (ERA) Statistics Committee. Tim holds a PAL Card (Powered Access Licence) to operate scissor lifts, self-propelled booms and vehicle-mounted platforms.

Chunyu Zhang – Managing Director, Shanghai Horizon Equipment & Engineering

Chunyu is one of the founding members of Construction Business Unit of Far East Horizon Group. In 2011, he jointly established Shanghai Horizon Equipment & Engineering Co Ltd, which is a fully owned subsidiary of Far East Horizon. He has rich experience and resources in the construction machinery financial leasing business and he has made Horizon Equipment & Engineering one of the biggest rental companies in China.

GORLY EQUIPMENT was established in 2015 as a part of the expansion plan of our parent company ShenZhen Gaoli Aerial Work Equipment Co. Ltd into the Malaysian market.

We manufactured self-propelled lifts since 2010 and have since delivered more than 5,000 units in China and countries around the world. Currently we are working on establishing our self-brand Gorly in Malaysia and to create awareness in the Malaysian market.

Our business focus is mainly on sales, rental and service in both corporate and personal for aerial work platform equipment such as **Scissor Lift, Boom Lift & Aluminium Scaffolding.**

GORLY JCPT1612

GORLY SELF-PROPELLED ELECTRIC SCISSOR LIFT

Gorly JCPT1612. One of the highest electric scissor lifts currently available in Malaysia. It is designed with compact size and lighter weight which suits best for indoor operation.

PRODUCT FEATURES

- ✓ *Working Height 15.80m*
- ✓ *Battery operated : Allowing 6 - 8 hours operation under normal condition.*
- ✓ *Easy Repair & Maintenance*
 - On-board Diagnostics System to assist on Troubleshoot.
 - Swing-out compartment for easy access to electric and hydraulic components.
 - Maintenance free on bearings, joint and scissor parts.
- ✓ *Eco Friendly – low noise emission and zero pollution.*

SAFETY FEATURES

- ✓ *Horn & Alarm*
- ✓ *Pothole Guard*
- ✓ *Auto Brake System*
- ✓ *Multi-Axis Tilt Sensors*
- ✓ *Drive Speed Interlock*
- ✓ *Emergency Stop at Platform & Ground*

The **Snorkel™ S3219E** is far from ordinary. This 5.79m electric slab scissor lift was designed to take everything a jobsite can throw at it — and more. Its super-heavy-duty steel construction and over-engineered components, maximize up time and minimize ownership costs. Plus, everything is easy to get to, which really cuts down on maintenance time. After all, the most valuable scissor lift on your jobsite is the one that's actually working.
